OBJECTIVE

Aiming to obtain Full Stack Developer role to leverage my comprehensive skills in both front-end and back-end technologies proven ability to create reusable components for an enterprise-level web application. Passionate about technology and building scalable web solution

---

TECHNICAL SKILLS

Language :- Javascript

Web Development :- HTML , CSS , DOM Manipulation , Async js , APIs , Context API ,

Node js , REST APIs , Mongoose , CRUD OPERATION , User Authentication & Authorization,

Git & version control

WebDev Tools :- VS code , Postman , Chrome DevTools , Github , Cloudinary

Frameworks :- Bootstrap , Tailwind , React js , Express js

Database :- MongoDB

PROJECTS

1 :- Real-Time Chat Application :

- Developed a real-time chat application that allows users to communicate with each other instantly in chat rooms.
- Node.js, Express.js, Socket.IO, MongoDB, React , Cloudinary
- **Key Features:**
    - Implemented real-time messaging using WebSockets (Socket.IO).
    - User authentication and registration with JWT and bcrypt.
    - Integrated MongoDB for message storage and retrieval.
    - Handled online/offline user presence and notifications.

2 :- E-Commerce Platform (Firebase) : Link

- Built a fully functional e-commerce platform with a user-friendly interface for browsing products, adding them to a cart.
- Firebase Authentication , Typescript
- **Key Features:**
    - User authentication with Firebase email and password encryption .
    - Product management, including adding/removing items and managing inventory.
    - Cart and order management system, including order history.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science – BNN College, Bhiwandi   (Second Year, Expected Graduation: [2025])

- **Relevant Coursework :** Web Development, Databases

Certifications : Linkedin

- **Scaler.com** – **Certificate in Node.js and React.js (Year)**
- **Gained expertise in building full-stack applications using Node.js for backend and React.js for frontend development.**
